

Appendix D

Minimum Hardware Specifications

LONGVIEW INDEPENDENT SCHOOL DISTRICT
2006 - 2008

Current Minimum Specifications for Repair or Donation of Computers: A computer that does not meet the following specifications will not have faulty hardware repaired by the technology department, nor will donations of computers with less than these specifications be accepted.

Processor: Intel Pentium III
Memory: 128M
Hard Drive: 4G

Current Minimum Specifications for Purchase of Computers: A new, supported (See Appendix F) computer must be chosen from the current quote list or specifically approved by the technology department; however, the basic specifications currently used are below:

Processor: Intel > 3.0GHz processor speed equivalence as compared to an Intel Pentium 4
Motherboard: True Intel board or an Intel chipset board that has passed LISD testing
Hard Drive: > 20G UATA
Memory: 256M (laptops) 512M (desktops)
Video: Varies with application
NIC: 10/100/1000 Mb (desktop)
802.11b/g (laptop)

Current Minimum Specifications for Repair or Donation of Printers: Parts availability and price determine the feasibility of maintenance and repair to any particular printing device. Printers that do not meet the following specifications will not be repaired nor will donations of printers with less than these specifications be accepted:

Type: True Laser Technology for Black and White Printers (No LED or Thermal)
True Laser or Solid Transfer for Color Printers (No LED or Thermal)
Age: < 6 years and toner and parts available as commodity items
